

eXact learning MOBILE

Mobile learning is becoming a key factor for organizations that need to deliver rapid training without compromising quality. Learners must access information easily, at any time and anywhere - and they need that information to be tailored to their requirements. Organizations that aim to improve their key business processes and their human resource capital, deploy training rapidly, keep dispersed teams aligned and up-to-date, sharpen key skills in key roles to achieve competency and required certifications will find, with eXact learning Mobile, the ultimate mobile solution for delivery and tracking of standards-compliant training.

FEATURES

- Online/Offline tracking and synching - Take a course while travelling, even where there's no connectivity. Update progress, and complete work later, on any device.
- Standards-compliant delivery and tracking - Content is created according to industry standards (e.g. SCORM, xApi) for a future-proof investment that will work with any LMS/LRS.
- Extensibility and interoperability - eXact learning Mobile can extend its capabilities by adding services and modules, such as for 3rd party services (e.g. stock quotes). Additionally, organizations can also distribute and access courses from other systems (e.g. LMS, LRS, CMS, etc.) thus ensuring a fully integrated business framework.
- Light content downloads - By being separated from their engine, courses download in a matter of seconds. This enables content authors to deliver courses that are based on structured, web-like pedagogical paradigms, which, otherwise, would have required large downloads.
- Create content that is based on a unique template and model technology, capable to bring unsurpassed quality with rapid and massive production together.

Supported Platforms:

- iOS (iOS 7 or later) iPad 2/mini or later and iPhone 5 or later.
- Android - Smartphones and tablets with Android 4.1 or later.
- Windows 10

BENEFITS

Flexible Performance Support

eXact learning Mobile is a flexible solution, which provides for training and performance support where and when the actual work takes place. This allows new skills and knowledge to be applied immediately.

Enhanced Learning Experiences

Learning content can be accessed easily from anywhere, without time constraints or the need for internet access. Learning content is adaptable to meet individual needs.

eXact learning Mobile provides the features required to accomplish individual educational goals, offers enhanced learning experiences and increases learners' motivation.

Increasing Efficiency of Sales Processes

Where product life cycles are short and there is a continuous stream of new products which employees must learn to sell, it's vital to provide training quickly and efficiently. Rather than taking sales associates away from the sales process for new product training, this training can be delivered on mobile devices directly to the sales team, without interrupting their work.

Improved Performance of Maintenance Support

Rather than carrying heavy technical manuals, delivering support material on mobile devices ensures that your maintenance team always has access to the most critical and up-to-date technical documentation.

Better Results of Training Programs

Using mobile devices enables training to occur when it is needed, when the learner is focusing on a particular issue, motivated to learn and attentive, willing, and receptive to receiving the information. By using mobile devices, learners can access reference materials, or instructions when needed. This improves the overall training results in your organization.

eXact learning solutions, is a leading software development company in the field of eLearning technology solutions. Its suite of applications includes:

- a learning content management system (eXact learning LCMS) which supports the online creation, management and delivery of digital contents and related services
- a client authoring tool to create, index, organize and package learning objects and courses (eXact learning Packager)
- tools to manage, deliver issue and track content for mobile devices (eXact learning Mobile)

All these tools are free-standing, scalable and can be integrated with both proprietary software and Open Source platforms.

eXact learning solutions is a sister company of Lattanzio Group.
